Employee Self-Service Support Portal

Ticket Creation

Employees can create tickets for account access, VPN issues, software requests, and hardware problems. Every ticket should include a short summary, business impact, and affected device or application.

Priority Rules

Low priority tickets are single-user questions with a workaround. Medium priority tickets block one user from no High priority tickets affect executives, customer-facing work, or multiple employees.

Attachment Policy

Users may attach screenshots, log snippets, and error messages. Agents should avoid requesting secrets, tokens,

Knowledge Search

Agents should search the knowledge base before escalating. If no matching article exists, agents should add a
